DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-38, drawn to a process of making an apparatus fibers by electrospinning, classified in class 239, subclass 294.
 - II. Claims 39-47, drawn to a nanofiber media chemical compound, classified in class 210, subclass 500.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the product of group I can be made by another apparatus, the product is not limited to the structural elements as included in the apparatus of group II, and can therefore be made by nanofiber gas jet (NGJ) process. The apparatus as claimed can be used to produce a distinct polymeric fiber, or fibers with a distinct composition. The apparatus and process of making have been classified together together for examination purpose although they constitute distinct inventions, allowability of an apparatus is based in structure, while allowability of a process is bases on process steps and the order than they are performed in a particular process.
